**Imported PWD Water** 55% from State Water Project

## WHY ARE THE STATE WATER PROJECT AND DELTA CONVEYANCE PROJECT IMPORTANT TO PWD WATER?

"Palmdale Water District receives about 55% of its water supply annually from the State Water Project to meet the needs of its customers. We are reliant on the Delta to get those water deliveries to Lake Palmdale. Without a strong infrastructure at the Delta, disruptions would prove to be disastrous. We want to see the Delta Conveyance Project completed."

Dennis D. LaMoreaux, General Manager, PWD

"It is critical that water infrastructure in the Delta is improved to ensure the future availability of water in Palmdale and its surrounding communities. We support the Delta Conveyance Project and its plan to modernize the infrastructure in the Sacramento-San Joaquin Delta. It's important to have the foresight to plan accordingly so that the state's water delivery system is improved and maintained for future generations."

Don Wilson, Board President, PWD

## Modernizing California's Water Infrastructure

The Delta Conveyance Project (DCP) is a proposal to modernize water infrastructure in the Sacramento-San Joaquin Delta by creating an additional point of diversion along the Sacramento River coupled with conveyance facilities in the Delta. The DCP is intended to restore and protect the reliability of State Water Project (SWP) and to ensure California's largest supply of clean water is climate resilient.
