Input Template for Material Put into Trucks or Rail Cars for Transport - including on-site

Question: If known, what is the average moisture content of the RTM put in trucks/rail cars for transport? If unknown, I will assume 12%.
Answer: For RTM to be transported from Twin Cities to the Southern Forebay, the intention is to dry it down to an average moisture content of 22%.

m. what is the average silt content of the stockpile material? If known, I will use 6.9%.

Notes:

We use 5 tonish plant stockpiles.

Stockpile will consist of both coarse and fine aggregates.

Stockpiles will be used every working day, with material being processed for ready mix or grout and new material being brought in.

Days per year do not account for holidays.

APPENDIX H - Preliminary Operations and Maintenance Information for EIR Air Quality and Traffic Analyses for the Central Corridor

This appendix provides preliminary operations and maintenance information for the Central Corridor related to quantities of equipment and vehicle use and employee travel needs to develop air quality and traffic analyses in the EIR. The information is provided in the following attachments organized by project design capacity option:

- Attachment 1. Project Design Capacity for 6,000 cfs
- Attachment 2. Project Design Capacity for 7,500 cfs
- Attachment 3. Project Design Capacity for 3,000 cfs
- Attachment 4. Project Design Capacity for 4,500 cfs

APPENDIX H – ATTACHMENT 1

Project Design Capacity 6,000 cfs

APPENDIX I - Preliminary Operations and Maintenance Information for EIR Air Quality and Traffic Analyses for the Eastern Corridor

This appendix provides preliminary operations and maintenance information for the Eastern Corridor related to quantities of equipment and vehicle use and employee travel needs to develop air quality and traffic analyses in the EIR. The information is provided in the following attachments organized by project design capacity option:

- Attachment 1. Project Design Capacity for 6,000 cfs
- Attachment 2. Project Design Capacity for 7,500 cfs
- Attachment 3. Project Design Capacity for 3,000 cfs
- Attachment 4. Project Design Capacity for 4,500 cfs

APPENDIX I – ATTACHMENT 1
